PROFESSIONAL SUMMARY

First-year B.Voc-IT student building a strong foundation in programming, data analysis, artificial intelligence, and modern computing technologies through hands-on learning and technical projects. Demonstrates a proactive approach to problem-solving, continuous learning, and applying emerging technologies to practical challenges. Seeking an IT internship to contribute to real-world projects, strengthen engineering capabilities, and develop into a high-performing technology professional.

PROJECTS

Velora — Full-Stack E-Commerce Website

Next.js · TypeScript · Prisma · PostgreSQL · REST APIs · Vercel – Using ChatGPT

Live Demo: <https://velora-e-commerce-website-five.vercel.app>

GitHub: [Mohammedyaseen-777/Velora E-Commerce Website](#)

- Developed a full-stack e-commerce web application with modern UI/UX.
- Implemented secure user authentication and role-based access.
- Built RESTful APIs for product, cart, order, and payment workflows.
- Integrated Prisma ORM with PostgreSQL for efficient database management.
- Deployed the application on Vercel for high performance and scalability.
- Ensured responsive design and cross-browser compatibility.

EDUCATION

B.Voc-IT (Bachelor of Vocation in Information Technology)

Skill College, — First Year, Pursuing

AREA OF INTEREST

Interested in building a long-term career in IT and advanced technologies, including AI/ML. Comfortable with routine computer-based tasks and digital communication tools.
